THETFORD SERVICE DOORS

Thetford offers a range of elegantly designed high-quality service doors. All four models are produced using high-grade lightweight plastics, making them extremely durable. The doors are, of course, watertight and UV resistant, and the double seal ensures optimum insulation.

MODERN AND SAFE

The service doors have a modern streamlined appearance. With their rounded shapes and integrated hinges they fit in harmoniously with the outer wall of your caravan or motorhome.

The special pushbutton locks allow the doors to be closed securely, so they can't spring open unexpectedly or be forced open.

SELF-INSTALLATION

Thetford service doors are easy to install yourself – horizontally or vertically. A step-by-step guide is supplied along with a template for creating the opening in the vehicle wall. Thetford service doors are suitable for walls with a thickness of between 23 and 39 mm.

THE THETFORD CASSETTE TOILET: THE PERFECT MOBILE TOILET SOLUTION!

For ease of use, the Thetford Cassette Toilet surpasses any comparable toilet. Its unique design ensures it fits with every modern caravan and motorhome interior. The Cassette Toilet is manufactured from high quality materials, has a powerful flushing system, and has advanced fixtures and fittings. What's more, the toilet will form an integral part of the bathroom of any caravan or motorhome. Combined with Thetford toilet additives, the Thetford Cassette Toilet is the ultimate sanitary solution for your caravan or camper!

WHAT IS SO UNIQUE ABOUT THE THETFORD CASSETTE TOILET?

What makes the Thetford Cassette Toilet unique is external access. A small door on the outside of your vehicle gives you access to the detachable

waste tank, making it much easier to prepare the tank for use from outside. It also makes it easier to empty and top up the waste tank hygienically, and you won't spill a drop!

HOW DOES THE CASSETTE TOILET WORK?

The toilet consists of two parts: a permanently installed toilet and a waste tank that you can access and easily detach from outside. To prepare the toilet for use, you simply add toilet fluid to the waste tank. For models with an in-built water tank, you also need to fill the water tank. The toilet is then ready for use. A level indicator shows when you have to empty the waste tank. Then all you have to do is detach the waste tank and empty it in the nearest authorised waste dump. After that, you make the toilet ready for use again.

THE TOP MODEL IN THE CASSETTE TOILET RANGE: THE CASSETTE C-400

The Cassette C-400 is the top model in the range. This series has several unique features, including the fact that the waste tank has wheels and a retractable handle to allow ease of handling. In addition, the working mechanism in the waste tank is removable, making the inside of the tank easy to clean and maintain, while an advanced level indicator display shows the levels in the waste tank and/or water tank.

The Cassette C-400 models have a fixed toilet bowl and can be installed on both the left and right.

* These models are available for building in by the customer – they are supplied including service door 3.

THE C2, C3 AND C4 CASSETTES

The C2, C3 and C4 Cassette models have a fixed toilet bowl and therefore blend in harmoniously with your bathroom interior. All of these models can be installed on both the left and right, which makes them suitable for installation in almost every caravan or motorhome. The C2 and C3 models have a separate, splash-free storage compartment for toilet paper.

CASSETTE C-200

The Cassette C-200 models are equipped with a toilet bowl that can revolve 180 degrees on the toilet base. Downward pressure on the seat locks the toilet bowl into the desired position. The C-200 models can be installed as freestanding units against any outer wall of the vehicle. Because you can revolve the toilet bowl before use, you experience optimal comfort without losing any space.

OPTIMAL USE OF SPACE

All Cassette Toilets save space. The various models, with either rotating or fixed toilet bowls, blend in seamlessly with your bathroom, making the best use of the limited space.

LEVEL INDICATOR: TIME TO EMPTY THE WASTE TANK

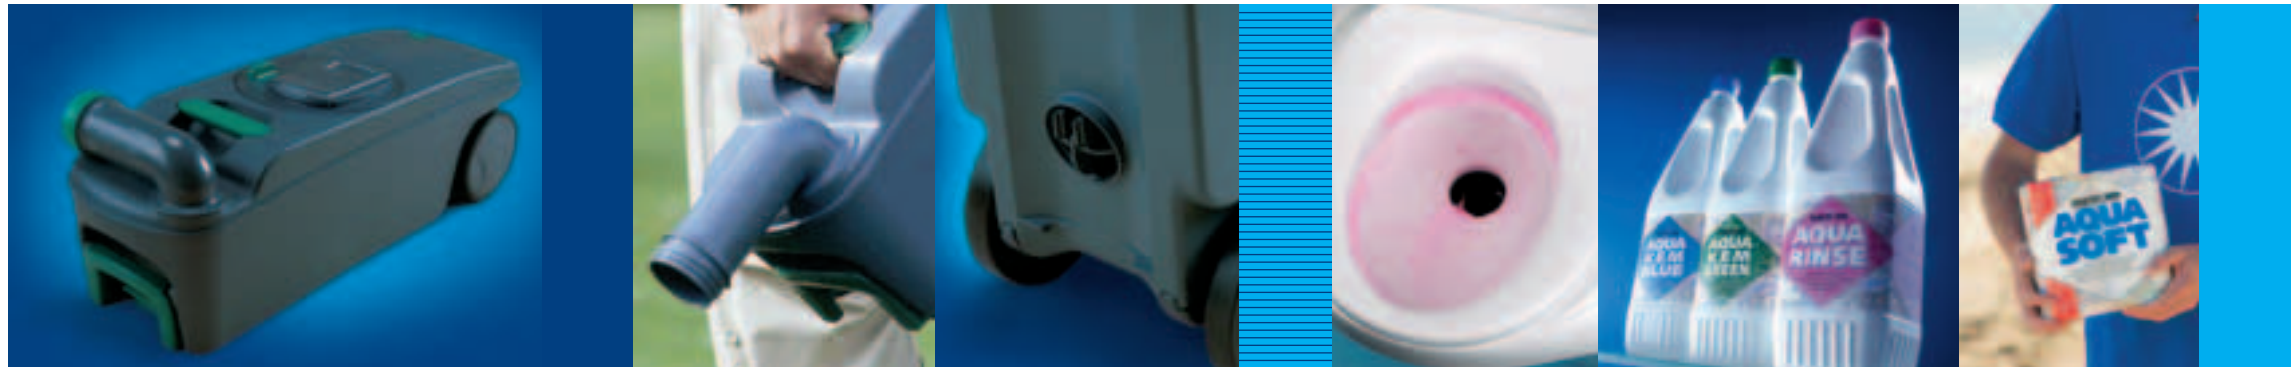

Every Cassette Toilet is equipped with a level indicator. The indicator is activated as soon as the tank is about two-thirds full, and it shows you when the tank needs to be emptied. Selected models at the top of the range have a level indicator display on the waste tank and/or flush water tank, with three levels displayed in illuminated LED's.

VENT PLUNGER FOR EMPTYING WITHOUT SPLASHING

The waste tank is equipped with a vent plunger, which you press when you are emptying the tank in order to prevent splashing.

HIGH-QUALITY PLASTIC FOR A DURABLE, USER-FRIENDLY AND MAINTENANCE-FRIENDLY TOILET

The high-quality plastic materials are durable and, combined with the rounded shape, make the toilet very easy to clean and maintain.

AUTOMATIC PRESSURE RELEASE VENT PREVENTS BUILD-UP OF GASES IN THE WASTE TANK

The automatic pressure release vent prevents pressure from building up in the waste tank. This ensures that the waste tank doesn't splash when you are opening it.

INDEPENDENT WATER SUPPLY OR CONNECTED TO YOUR VEHICLE'S CENTRAL WATER TANK

Both the models with a rotating toilet bowl or with a fixed toilet bowl are available in versions that use the caravan or motorhomes central water tank or use their own flush-water tank.

LIGHTWEIGHT

The relatively low weight of the Cassette Toilet (8.5 kg to 10.3 kg) helps to keep the total weight of your vehicle within the legal maximum.

IN-BUILT EMPTYING SPOUT: NO FIDDLING ABOUT WITH LOOSE PARTS

The waste tank has an in-built rotating emptying spout that makes it very easy to empty the tank. There are no separate parts to be dismantled and cleaned.

EXTERNAL VENTILATION FOR ODOUR-FREE TRAVELLING

Some Cassette Toilets include a feature that expels unpleasant smells from your vehicle through a special pressure release vent. This guarantees odour-free travelling.

POWERFUL FLUSHING SYSTEM

All Cassette Toilets are equipped with a powerful manual or electric (12 V) flushing system. For models with an in-built flush-water tank, you just have to add Aqua Rinse to the flush-water and your toilet will be fresh and clean after every flush.

Aqua Rinse leaves a protective layer in the toilet bowl that keeps the flush-water fresh and ensures that your toilet flushes effectively.

SPECIAL TOILET ADDITIVES AND TOILET PAPER

In order to ensure the effective functionality and optimum performance of the toilet system, Thetford offers special toilet paper and toilet additives. The toilet additives prevent unpleasant smells, suppress gas formation and keep the inside of the waste tank clean. They promote the decomposition of solids in the waste tank, preventing blockages when emptying. Aqua Soft makes its contribution too: this special toilet paper quickly dissolves in the waste tank. In addition, by discouraging sticking, Aqua Soft ensures that no defect or damage develops in the waste tank. The range of toilet additives available may vary for each country.

THETFORD SERVICE

Thetford service consists of intensive support through sales outlets, authorised service centres and the Thetford website. You can always visit for expert advice about the whole range of Thetford products. Of course you can also contact us directly.

WHERE TO BUY?
